

## Team Up with Peace Corps on a new End-User Application

Project Title	Team Up with Peace Corps on a new End-User Application
Project Summary	Work alongside a creative Peace Corp team on the design and development of an open source web-based program to strengthen the administration of a future volunteer recruiting platform.
Country	United States

## Project Description

The Peace Corps is a volunteer program run by the United States government. Its official mission is to provide social and economic development abroad through technical assistance, while promoting mutual understanding between Americans and populations served.

This internship is an opportunity to work alongside a Peace Corps creative team on a new web-based, mobile, end-user application to strengthen the administration of Peace Corps new future volunteer recruiting platform.

The new application will be either a shared service with the Department of State, United Nations or some other organization or agency. You will work with Peace Corps analysts to develop the application's substantive content. You will collaborate with the Peace Corps team on the application's design and then write the code to bring the application to life. The goal is to build an intuitive, mobile ready, user-friendly product to help simplify a complex administrative process.

## Required Skills or Interests

### Skill(s)

Analytical writing

Coding

Design thinking

Software development

## Additional Information

### Required Skill(s) or Interests

Coding, Problem-solving, Design thinking, Self-motivation & independence, Analytics , and Software development.

### Additional Information

You will work closely with the Peace Corps Office of Technology Transfer team and the Office of Chief Information Officer (OCIO), especially during the initial phase of the project when we'll collaborate on the design of the application.

The ideal candidate will have front and back end web application development expertise using only open source frameworks, libraries, and tools. The ideal candidate should be literate in the latest versions of HTML, CSS, JavaScript, or other scripting languages and understanding of Databases such as MySQL. A good understanding of modern cloud based publishing practices is a plus. You should be available for periodic video calls during business hours (east coast time) for the duration of the project. The Peace Corps team is flexible and will schedule calls that accommodate your schedule.

## Language Requirements

*None*
